

Yorkville: C120 Speaker

C120 - Speaker - 100w, 5 inch / tweeter	List Price \$99.00	RS Price \$79.20
--	-------------------------------------	-----------------------------------

The Coliseum C120 is a high-end, water resistant speaker featuring specially treated drivers and a sculpted ABS plastic enclosure. This compact speaker is ideally suited for many applications: commercial installations, home theatre, home stereo, mobile applications, reference monitor, personal stage monitor and can even be used outdoors.

The C120 is a bass reflex enclosure with a tuned port and a 5" woofer, which provides improved bass performance over conventional 5" woofer enclosures. Removing the press-fit grille gives access to the eyeball tweeter, which can be swiveled to suit various listening positions. The C120 will handle 100 Watts of continuous music and is accurate from 75 Hz to over 19 kHz.

The C120 is designed to allow a multitude of mounting options including a 'press-fit' microphone stand mount, integral key hole screw-slots or the provided metal U-bracket which allows it to be angled up, down or sideways depending on the mounting orientation. The optional swivel mount (C120MOUNT) allows the C120 to be dropped through a ceiling or suspended from a wall in any number of angles and includes a safety wire for peace of mind. For maximum convenience in live or mobile applications, the back plate features push terminals and dual 1/4" inputs. The C120 is available in a low-reflectance black (C120) or white (C120W) finish with a matching, perforated metal grille and can be painted to match its surroundings.

Also available is the C120/70. The integrated 70V 'matching transformer' allows multiple C120's to be connected together without danger of overloading the power amplifier due to impedance drop. The user has a choice of three sensitivity settings (10W, 20W, 30W or bypass) selected via a rotary switch located on the rear panel of the speaker, allowing convenient adjustment of the relative volumes of multiple interconnected cabinets.

The C120 is available in both black (C120) and white (C120W) finishes.

Coliseum Mini Features:

- Full range of sub-compact installation specific models ranging from 5 watt wall speakers to 100 watt professional quality cabinets
- 70V option available on most models
- Attractive and discrete white paintable finish
- A variety of custom installation hardware available for all models

Yorkville: C120 Speaker

Specifications:

System Type	2-way
Active or Passive	Passive
Program Power (Watts)	100
Nominal Impedance (Ohms)	8
Sensitivity (dB @1Watt/1m)	94
Max SPL (dB)	104
Frequency Response (Hz +/- 3db)	75 - 19,000
Driver Configuration	Tweeter, 5 inch
HF Driver(s)	Aimable Mylar Tweeter
HF Dispersion (°H x °V)	90x90
LF Driver(s)	5 inch
Inputs	3
Inputs - 1/4" Jacks	2
Inputs - Screw Terminal	1 (Push Terminal)
Flying Hardware	U-Bracket, 2 Rear Key Hole Mounts, Mic Stand Mount
Optional Flying Hardware	Swivel Mount (C120MK)
Enclosure Materials	Injection Molded, ABS Plastic
Port(s)	1
Grille	Perforated Steel
Covering / Finish	Low Reflective Black
Optional Covering / Finishes	Low Reflective White
Dimensions (DWH xbackW, inches)	6.5 x 6.75 x 10.25 x 6
Dimensions (DWH xbackW, cm)	16.5 x 17 x 26 x 16
Weight (lbs/kg)	4.7 / 2.1

Coliseum Mini Overview:

After years of experience with enclosure design, it was logical for Yorkville to apply its knowledge to the design of a range of speaker cabinets that have been specifically designed for small-scale installation purposes. The knowledge that we gained while developing the TX, élite, Pulse and Performance series enclosures was applied to yield a series of practical yet cost effective installation enclosures.

All enclosures and grilles can be easily refinished and many have the option of coming in either a black or white finish. Designed for fixed installation or live use, the Coliseum Mini Series like the C110, C170 and WM5T have a complete list of features that make them an extremely good value. The practically configured C110 incorporates a multi-tap 70V transformer for fixed installations while the waterproof C120 is perfect for indoor or outdoor application as a loudspeaker or can be mounted on a microphone stand as a mini monitor. The WM5T in-wall speaker is a clean, high performance solution that is sure to solve space constraint issues. Basic mounting hardware is included with most models.
